± Under the Carl D. Perkins Vocational and Technical Education Act of 1998, States were required to report performance data on four core accountability indicators. The third core indicator measures placement and retention in further education, training, or employment. For the post-secondary level, this indicator is divided into two sub-indicators: 1.) placement in further education, training, or employment, and 2.) retention in further education, training, or employment. The sub-indicator on placement measures the percentage of post-secondary graduates of vocational education programs that transitioned to further education, training, employment, or military service programs within a defined time period.
